

L.B. DAVERN RESERVE

WANDONG, VICTORIA

TENNIS & NETBALL COURTS

Project	Design and specification of two multisport courts
Client	Mitchell Shire Council
Timing	October 2019 - February 2020
Surface type	Acrylic

iDwala was awarded the detailed design and specification tender of two new outdoor community multisport courts for Mitchell Shire Council at the L.B. Davern Reserve in Wandong, Victoria.

The courts were designed and engineered to meet the strict requirements of both Netball and Tennis Victoria, whilst promoting safety, playability and accessibility to community user groups.

The site's custom made design included the establishment of a new concrete pavement, a new drainage design, fencing, upgraded electrical and lighting systems, all of which would work seamlessly and complement the new surrounding pathways and landscaping Council had envisioned.

iDwala was also responsible for assisting Council with the management and supervision of the quality / hold point inspections throughout the contract along with the provision of technical advice and recommendations relating to the construction phase.

Armed with both exceptional construction and design knowledge, iDwala was able to respond to the construction contractor with regards to design clarifications, site processes and methodologies. Providing this level of technical support on behalf of Council gave Mitchell Shire Council project manager the confidence they needed to ensure the project would be completed to the highest standard of finish whilst meeting the governing sporting body requirements.
